

Monthly Update

For March 2023

From Public Health Director, Billy Pitts:

Good morning, Happy April, and Happy Easter!

I am attaching the monthly COVID update for Marshall County for March 2023. The community transmission levels for March is down across the state. I wish I could figure out how to copy and attach the map to the report because it is the first time since I can recall that the entire state is in green. Marshall had only 60 reported cases in March bringing us to a grand total of 10,614 cases reported since the beginning of the pandemic.

I want to remind everyone that the authorized vaccines and protocol for administering the vaccine continually changes. You can find the latest information on our website at marshallcohealthdepartment.com. We also share this information regularly on our social media sites.

Have a great day and Easter Week!

Billy Pitts, MHA, MHR
